Welcome to the Adobe Acrobat extension for Google Chrome. The extension makes your document tasks easier and faster by allowing you to interact with Acrobat directly from within Chrome. With this all-new extension for Chrome, you can easily:

Convert web pages into PDF files

You can easily convert web pages to rich, high-quality PDF files that maintain the look and feel of the original content.

- 1 Open a web page in a new Chrome tab or refresh any other existing tab which has a web page loaded. The extension is enabled once the web page is completely downloaded.
- 2 Click the Adobe Acrobat icon displayed in the upper-right corner of the Chrome toolbar, and then choose **Convert webpage to PDF**.

- 3 Provide the file name in the Save As dialog box, and then click **Save**.
- 4 The web page is converted to PDF, and then the PDF opens in Acrobat.

Add web pages to existing PDF files

Open a PDF in the Acrobat desktop application from Chrome

Use Acrobat online services to convert and combine files in your browser
